

INSTITUTIONAL REAL ESTATE • FINANCE • AI-ENABLED

Real Estate-oriented finance professional bridging Big 4 audit, Tokyo-based buy-side equity research, and Deloitte Finance Transformation — currently engaged with a real estate asset management platform at a major global financial institution. CPA, MBA, CFA Level III Candidate.

EXPERIENCE

Senior Consultant — Finance Transformation, Real Estate Finance Operate

Dec 2025 – Present

Deloitte Consulting LLP • Costa Mesa, California

Engagement: a \$2M+ annual transformation engagement supporting the real estate asset management platform of a major global financial institution — direct RE AUM across multiple capital vehicles spanning core through development strategies, with global operations.

- Support fund controllership and reporting workstreams across **8+** fund vehicles and **15+** separate accounts spanning core, core-plus, opportunistic, and development real estate strategies — contributing to NAV preparation, fund-level reporting, intercompany reconciliations, capital call / distribution mechanics, and waterfall calculations.
- Helped diagnose and redesign recurring finance processes (NAV preparation, fund-level reporting, intercompany reconciliations, management reporting) — initiatives targeting **30%** manual effort reduction and **3-business-day** close cycle compression across **40+** recurring deliverables, with business cases adopted by client steering committees.
- Identified and scoped **12 AI / automation use cases** across real estate finance; developed detailed implementation plans for **4 prioritized initiatives** — intelligent document processing for fund agreements and lease abstracts, reconciliation auto-matching (targeting **65% → 88%** auto-match rate with **35%** exception reduction), NAV-close anomaly detection, and generative-AI fund commentary drafting (targeting **40%** time reduction across **15+** deliverables).
- Built and operationalized a working prototype of one of the four prioritized AI initiatives — a reconciliation auto-matching tool now in pilot use across **5+** fund-level intercompany reconciliation workflows; targeting **~20 hours/week** of manual review elimination across the **12-person** fund accounting team and serving as the proof-of-concept that accelerated steering committee approval of the broader automation roadmap.

Hedge Fund Intern — Equity Research, Semiconductors / Technology / Automotive

Mar 2025 – Aug 2025

Asian Technology Advisors • Tokyo, Japan

- Authored **15+** company coverage notes spanning Asia-Pacific semiconductors, technology, and automotive — supporting senior-analyst coverage decisions and portfolio recommendations across **\$200M–\$10B** AUM mandates.
- Built and refined DCF, sum-of-the-parts, and scenario-based valuation models across coverage names — outputs incorporated into earnings reviews, thesis updates, and quarterly portfolio review materials.
- Covered the AI infrastructure capex cycle across Asia-Pacific semiconductor leaders (TSMC, Samsung, SK Hynix, Tokyo Electron) and global hyperscaler customers — building direct line-of-sight into the data center demand fundamentals now central to digital-infrastructure REIT and data-center investment theses.

Senior Associate — Audit, Banking & Capital Markets

Sep 2021 – Oct 2023

PwC • Denver, Colorado

- Performed substantive audit procedures across loan portfolios, allowance for credit losses (CECL), collateral valuations, and risk assessments for banking and capital markets clients — including portfolios with real estate lending and structured finance exposure.
- Executed integrated audit and SOX control testing across multi-entity bank holding companies — developing direct working familiarity with credit risk methodology, regulatory frameworks, and balance-sheet treatment of real estate lending and structured finance positions.
- Built audit automation workflows using Alteryx and PwC Digital Lab tools — drove efficiency gains of up to **20%** across engagements while coordinating **20+** team members across India and Argentina.

Audit Senior — Investment Fund Practice

Jan 2019 – Sep 2021

Plante Moran PLLC • Denver, Colorado

- Supervised audit engagements across real estate funds, private equity funds, and alternative investment vehicles — including substantive testing of capital account roll-forwards, management fee and carried interest calculations, distribution waterfalls, and side letter compliance.
- Performed fair value testing under ASC 820 across real estate and alternative asset holdings — including review of independent appraisal methodologies, cap rate and discount rate assumptions, and unrealized gain/loss measurements driving fund NAV.
- Supervised **3** junior staff; achieved **100%** on-time delivery; drafted engagement budgets averaging **\$100K–\$300K**; assumed manager-level responsibilities (audit planning, fieldwork oversight, partner review coordination) on select engagements.

EDUCATION

MBA • Waseda University, Tokyo, Japan

2023 – 2025

Master of Accountancy • University of Denver, Denver, CO

2016 – 2018

B.S. Biochemistry • University of Washington, Seattle, WA • *Dean's List*
